Description

Textured counter mats are our best-selling options for a reason, offering both quality and value. With a high standard at an affordable price, these mats are the go-to choice for anyone looking to make a lasting impression on their counter space. Perfect for businesses that need reliability without the extra cost. Variable-data printing (VDP) (Also known as variable-information printing (VIP) or VI) is a form of digital printing, including on-demand printing, in which elements such as text, graphics and images may be changed from one printed piece to the next, without stopping or slowing down the printing process and using information from a database or external file. For example, a set of labels, each with the same basic layout, can be printed with a different name on each label. Variable data printing is mainly used for direct marketing, customer relationship management, advertising, invoicing and applying addressing on self-mailers, brochures or postcard campaigns.
