Description

The 5m Retractable Tape Measure means business. Designed with a sturdy rubber outer, wrist strap, and a built-in belt clip, it's ready to go wherever your next project takes you. Marked in both metric and imperial units, it features three easy-access buttons to lock the tape exactly where you need it. Customise it with a full-colour digital decal for branding that measures up. Variable-data printing (VDP) (Also known as variable-information printing (VIP) or VI) is a form of digital printing, including on-demand printing, in which elements such as text, graphics and images may be changed from one printed piece to the next, without stopping or slowing down the printing process and using information from a database or external file. For example, a set of labels with the same basic layout can be printed with a different name on each label. Variable data printing is mainly used for direct marketing, customer relationship management, advertising, invoicing, and applying addressing on self-mailers, brochures, or postcard campaigns. *** No solid colours near or around the edges of the sticker as it will cause the sticker to curl around the edges over time. Digital Label – White label base *** Note: Epoxy Dome service is 15 days.
