Description

The bamboo wireless charging clock can be used on a desk, or a nightstand. The clock displays both time (12 and 24hr formats), date and the temperature (Fahrenheit or Celsius) with an LED display. The clock has an alarm function that you can activate. The clock has a top surface which acts as a 5W wireless charging pad that is compatible with most devices. Includes a micro-b charger and instructions on how to set up. Bamboo is a natural material that produces unavoidable variances in the grain pattern, colour and branding. The wireless charger will work at the optimum power level when used with a 5V/2.4A mains adaptor. Using a PC/laptop USB output to power the wireless charger may lead to slow charging, or not charging at all. Other factors like, positioning on the charging surface and the type of case used may also impact wireless charging. Bamboo is a natural material and because the plant is fast growing, it places less demands on natural resources and produces a material that is durable and versatile. Bamboo can also produce unavoidable variances in the grain pattern and colour.
